ABOUT US

Texon Services is a newly established MEP and building services company based in the United Arab Emirates. We specialize in delivering reliable, efficient, and compliant technical solutions in the fields of electrical, plumbing, HVAC, low-current systems, and solar installations.

Our goal is to provide high-quality workmanship and responsive service for residential, commercial, and industrial clients. While Texon is new in the market, our team consists of experienced professionals with hands-on knowledge and practical expertise in the UAE construction and maintenance industry.

We understand that building trust is crucial, especially as a new company. That's why we emphasize transparency, detailed documentation, and clear communication throughout every stage of the project. Our commitment is to establish long-term relationships based on performance, accountability, and integrity.

VISION & MISSION

OUR VISION

To be recognized as a dependable and professional MEP service provider in the UAE, known for our commitment to quality, safety, and client satisfaction.

OUR MISSION

To deliver essential building services that meet regulatory standards and exceed client expectations, using skilled manpower, proper planning, and strong technical knowledge.

OUR SERVICES

Electrical Works

Texon Services offers comprehensive electrical solutions for residential, commercial, and industrial properties.

Our services include internal and external wiring, installation of distribution boards, control panels, load testing, grounding systems, lighting design and installation, cable management systems, and compliance with DEWA/SEWA/Federal Authority standards. We ensure safe, efficient, and reliable electrical installations tailored to each project. We maintain strict quality control and only use certified electrical components.

Plumbing Works

Our plumbing services cover the full scope of water systems, including hot and cold water piping, drainage and wastewater systems, bathroom and kitchen installations, water tank and pump setups, and leak detection. We also provide pressure testing, pipe insulation, and stormwater management. All works are performed using quality materials and in accordance with local regulations. We prioritize hygiene, safety, and operational longevity.

HVAC

(Heating, Ventilation, and Air Conditioning)

We deliver end-to-end HVAC services, including system design, equipment supply, installation, and maintenance of split, ducted, and central AC systems. Our expertise also includes chilled water piping, ventilation systems, air balancing, thermostat installation, and annual service contracts. We focus on energy efficiency, comfort, and climate control reliability and ensure every system is optimized for performance and environmental responsibility.

Lighting Works

We specialize in decorative, architectural, landscape, and functional lighting systems. From LED upgrades and facade lighting to emergency and exit lighting, our solutions are designed for energy efficiency and visual appeal. We provide complete lighting circuit planning, automation options, and smart controls. Every lighting solution is customized to enhance aesthetics, safety, and performance.

Low Current Systems (Security Systems, Fire Alarm Systems, Telecommunication Systems, Building Management System (BMS))

- **Security Systems:** Installation of CCTV, intruder alarms, motion sensors, and access control systems for 24/7 property protection.
- **Fire Alarm Systems:** State-of-the-art fire detection systems, including smoke and heat detectors, ensuring quick responses to fire emergencies.
- **Telecommunication Systems:** Installation of CCTV, intruder alarms, motion sensors, and access control systems for 24/7 property protection.
- **Building Management System (BMS):** Centralized control of HVAC, lighting, security, and other building operations to optimize energy use and improve efficiency.

Each system is customized to meet client needs, ensuring scalability, security, and compliance with all regulations.

Solar System Installation

Texon provides sustainable energy solutions through solar panel installation, inverter and battery setups, DEWA/SEWA registration support, and system monitoring. We offer grid-tied, off-grid, and hybrid systems for homes and businesses, including routine maintenance to ensure long-term efficiency. Our solar experts ensure each system is compliant, eco-friendly, and financially beneficial in the long term.

Annual Maintenance Contracts (AMC)

Texon offers reliable maintenance services for all core MEP systems. Our AMC packages include scheduled servicing of HVAC units, plumbing lines, electrical systems, fire safety systems, and low-current networks. We help property owners and facility managers prevent breakdowns, maintain compliance, and ensure operational continuity. We document all maintenance activities and provide full transparency to our clients.

WHY CHOOSE TEXON?

- UAE-based team with local project experience
- Compliant with UAE codes and safety standards
- Friendly and responsive customer service
- Competitive pricing for all services
- On-time project delivery
- Transparent quotations and documentation
- Strong commitment to quality, safety, and long-term
